Ericsson Global Device Testing and Certification

Ericsson offers end-to-end testing and certification services for global device commercialization

Overview

In the ever-growing global economy, having a partner that helps you navigate complexities is critical to success. Ericsson can be that partner for organizations looking to launch their wireless devices...whether domestically or across the globe.

Ericsson's Global Device Connectivity is a full-service solution from laboratory and field performance testing to in-country certification. Ericsson can help you streamline the compliance process and meet country and regulatory requirements within global telecom standards.

Benefits

The benefits of the Global Device Testing and Certification service include:

- Facilitate market entry and streamline cost
- Simplify a complex process
- Improve efficiency for device launch on global cellular networks
- Meet in-country and regulatory requirements
- "White-glove" delivery with minimal involvement

Global Device Testing and Certification

Services offered

Device Certification

If you are looking for a turn-key approach to certification, then this option would be a great fit. By leaving all the worries to Ericsson, we can facilitate market entry of your device globally. This includes:

- Program management for all required approvals
- Country, regulatory and telecom industry approval
- Renewal process required for compliance

By monitoring the certification approval and renewal process we help:

- reduce redundant costs
- improve your time-to-market by streamlining market entry – in one country or globally

Device Testing

The purpose of testing is to sample the device's behavior in the lab and on some of the most challenging networks worldwide. Testing improves the likelihood of successfully passing all certification requirements.

Device application and antenna testing

- Laboratory tests for application and antenna performance to identify potential problems prior to certification
- Field testing can include pre-determined challenging countries and operators across a variety of cellular technologies

*To ensure your device launch meets all your criteria, additional customization can be provided to the testing process

Harness the power of Ericsson

Through Ericsson's network knowledge and extensive partnerships, we can provide in-country coordination and certification as well as laboratory and field testing tailored to your device launch and commercialization needs.

We bring experience and knowledge of the regulations and networks across multiple mobile operators in 150+ countries.

Is your organization ready for global device launch?

About Ericsson

We are a world leader in the rapidly changing environment of communications technology – providing equipment, software and services to enable transformation through mobility. Some 40 percent of global mobile traffic runs through networks we have supplied. More than 1 billion subscribers around the world rely every day on networks that we manage. With more than 37,000 granted patents, we have one of the industry's strongest intellectual property rights portfolios. Our leadership in technology and services has been a driving force behind the expansion and improvement of connectivity worldwide. We believe that through mobility, our society can be transformed for the better. New innovations and forms of expression are finding a greater audience, industries and hierarchies are being revolutionized, and we are seeing a fundamental change in the way we communicate, socialize and make decisions together. These exciting changes represent the realization of our vision: a Networked Society, where every person and every industry is empowered to reach their full potential.
