CENX UI OVERVIEW	6

Introduction

Ericsson has developed a comprehensive Training Programs service to satisfy the competence needs of our customers, from exploring new business opportunities to expertise required for operating a network. The Training Programs service is delineated into packages that have been developed to offer clearly defined, yet flexible training to target system and technology areas. Each package is divided into flows, to target specific functional areas within your organization for optimal benefits.

Service delivery is supported using various delivery methods including:

Delivery Method

Instructor Led Training (ILT)

Web-based Learning (WBL)

CENX UI Overview

LZU1082798 R1A

Description:

This course provides information and hands-on activities using the CENX User Interface to enable participants to become familiar with the information presented in each CENX UI view, to manipulate the UI views, and to accurately predict the results of UI operations.

Learning situation:

This course is based on theoretical and practical instructor-led lessons given in a technical environment using equipment and tools.

Learning objectives:

On completion of this course the participants will be able to:

- 1 Navigate the CENX Interface to locate network inventory, fault, and analytics data.
- 2 Use the search functionality to focus the UI.
- 3 Trace network connectivity and containment relationships.
- 4 Trace fault dependencies between network entities.

Target audience:

This course is suitable for anyone who is required to be familiar with CENX User Interface.

Prerequisites:

Successful completion of the following courses:

Telecommunications experience with OSS background

Duration and class size:

The length of the course is 1 day and the maximum number of participants is 8
